

Deep Learning / Image processing

Thank you for your interest in Agrivero.ai.

To get an idea of how you work, please complete the following 2 tasks. It should not take longer than 30 minutes. Please send the results to lina@agrivero.ai with the subject line "DL/IP CC I - <last_name>, <first_name>"

Task 1: Image processing (Estimated time: 15 min)

You are provided with 3 images of an agrivero table photographed in a lightbox. Please write code that segments the table without the wooden border. The resulting segmentation mask should be written out as "<filename>_mask.jpg". Result to hand in: 1 python file

Task 2: Deep Learning (Estimated time: 15 min)

The provided code includes errors. Please identify the errors and describe them in 1-2 sentences. Result to hand in: a txt file
